

HC Type

The HC cartridges are depth filters incorporated rigid supports materials to prevent the media deformation under high differential pressures, resulting in stable filtration. Free of binders and oils, which eliminate any extractables derived from them, thus the HC cartridges provide reliable filtration.

Features

- Incorporated rigid supports materials, which makes it possible to prevent the media deformation under high differential pressures. The HC cartridges provide stable removal efficiency and flow rates.
- Free of adhesive, surfactant and silicon, the HC cartridges provide reliable filtration of paints used for final products.
- Constructed of polypropylene, the HC cartridges provide excellent chemical compatibility characteristics and can be used in a wide range of liquids.

Major Applications

- High viscous liquids
- Various paints
- Various slurry
- Others

Ez-Change™
Capsule Filter Cartridge
This product can be installed in the Capsulate Filter "Ez-Change". Please refer to the Ez-Change catalog in detail.
