

Data Sheet

ClariSure® GP

Microglassfiber Cartridge Filters

mdi ClariSure® GP cartridge filters are specially designed multilayered precision filtration devices. These cartridge filters act as throughput enhancers, specially in case of difficult to filter solutions.

A microglassfiber upstream layer retains very fine colloidal particles and a downstream polypropylene layer checks any kind of media migration.

Applications

- Pre-filtration of difficult to filter solutions
- Pre-filtration of difficult to filter SVP like Oxytetracycline

Key Features

- High throughputs
- Long service life
- Non-toxic material of construction
- Sterilizable by Autoclaving/Steaming in place (SIP)

Quality Assurance

mdi quality management system emphasizes on quality by design rather by end product testing. Robust processes are developed for product manufacturing and are continuously monitored to ensure that the products meet their predetermined specifications and lot to lot reproducibility is ensured.

Certificate of Quality

Each cartridge filter lot is accompanied by individual certificate of quality to ensure traceable documentation at user's end.

It certifies the product compliance to various regulatory as well as user requirements.

Flow Rate

Each lot is tested for clean water flow rates to ensure that flow rates are within the specifications.

Pressure, Temperature Endurance

ClariSure[®] GP filters are validated to endure high operating pressure and temperature conditions which may be encountered during use.

Extractables

Extractables/leachables from *ClariSure*[®] GP filters, used at various stages of a biopharmaceutical manufacturing process, will add on and may impact the impurity profile of the desired product.

ClariSure[®] GP filters are validated to exhibit low extractables under harsh extraction conditions.

Total Traceability

ClariSure[®] GP filters come with completely traceable lot numbers to facilitate easy and fast retrieval of manufacturing and quality control data associated with each filter.

These unique lot numbers are laser etched on each filter device and also printed on the labels of the box in which individual filter is packed.

Packaging Integrity

ClariSure[®] GP filters are packed in bags to ensure package integrity during transit as well as to prevent particulate contamination while transferring to clean room process areas.

Other Regulatory Compliance

- Complies with USFDA 21 CFR 210.3(b)(6) for fiber release
- Complies with USFDA 21 CFR 177.1520 for fractional dissolution
- Materials of construction tested for toxicity as per Biological Reactivity Tests, In-vivo, USP <88> for class VI Plastics

Adapters and Dimensions

2.5" Mini Cartridge Filters

4463 Adapter (E0)

Total Length : 75 mm
Diameter : 56 mm

Seal-K Adapter (G0)

Total Length : 132 mm
Diameter : 56 mm

Seal-K Adapter (G0)

Total Length : 77 mm
Diameter : 56 mm

4440 Adapter (U0)

Total Length : 118 mm
Diameter : 56 mm

4463B Adapter (H0)

Total Length : 69 mm
Diameter : 56 mm

Seal-O Adapter (F0)

Total Length : 117 mm
Diameter : 56 mm

5" Mini Cartridge Filters

4463 Adapter (E0)

Total Length : 128 mm
Diameter : 56 mm

4463B Adapter (H0)

Total Length : 123 mm
Diameter : 56 mm

Adapters and Dimensions

Standard Cartridge Filters

10" Cartridge Filter- 7P Adapter with Fin (A0)

Total Length : 315 mm
Diameter : 70 mm

30" Cartridge Filter- 7P Adapter with Fin (A0)

Total Length : 795 mm
Diameter : 70 mm

20" Cartridge Filter- 7P Adapter with Fin (A0)

Total Length : 555 mm
Diameter : 70 mm

Linear Upscaling from Pilot Scale to Production Process

mdi offers a wide range of *ClariSure*[®] GP filters to provide linear scale up from lab scale to production process. While scaling up the process, the appropriate size filter can be selected by increasing the effective filtration area of filter proportionate to the process fluid volumes.

All Materials of construction as well as manufacturing process are identical for all filter devices starting from 800 cm² to 15000 cm² hence process scaling can be facilitated without triggering additional validation studies for given process conditions. **mdi** provides complete documentation for each of the *ClariSure*[®] GP filters there by reducing the additional validation cost and time.

Specifications

Mini Cartridge Filters

Construction

Filter Media	Microglassfiber
Support Layers	Polypropylene
Plastic Parts	Polypropylene
O rings	Silicone

Size

Size	2.5"	5"
Effective Filtration Area (Nominal)	800cm ²	1600cm ²

Operational

Max. Operating Temperature	80 °C @ < 30 psi (2 Kg/cm ²)
Max. Differential Pressure	50 psi (3.5 Kg/cm ²) @ 25 °C
Sterilization	Autoclavable/Steam Sterilized at 121°C for 30 minute, 30 Cycles.

Assurance

Toxicity	Passes Biological Reactivity tests, In Vivo, as per USP <88> for Class VI plastics
Particle Shedding	The filtrate complies with USP <788> test for particulate matter in injections
Non Fiber Releasing	Passes test as per USP and comply with USFDA 21 CFR Part 210.3(b)(6) for fiber release
Extractables with WFI	Passes NVR test as per USP <661>
Indirect Food Additives	All Polypropylene components meet the FDA Indirect Food Additive requirements cited in 21 CFR 177.1520
Oxidizable Substances	Passes test as per USP <1231>
Quality Management System	ISO-9001 Certified
USFDA	DMF No. 015554
